

Enterprise Inventory Management System

Connect your Purchasing, Warehouse, Sales and Finance operations into a single, unified platform.

Complete Order-to-Cash & Procure-to-Pay Coverage

Sales, purchasing, and warehouse in one system.

Multi-Location Inventory Control

Set up warehouses in simple parent-child locations, track stocks and move items easily with accurate transfer process.

Bad Stock & Free Stock Management

Manage stocks like damaged and free goods, with clear tracking and full audit control.

Financial Visibility Built In

Link transactions to GL entries to view/search posted activity by account with full history.

Flexible Master Data

Centralized items and categories, customers and suppliers, price lists, and chart of accounts.

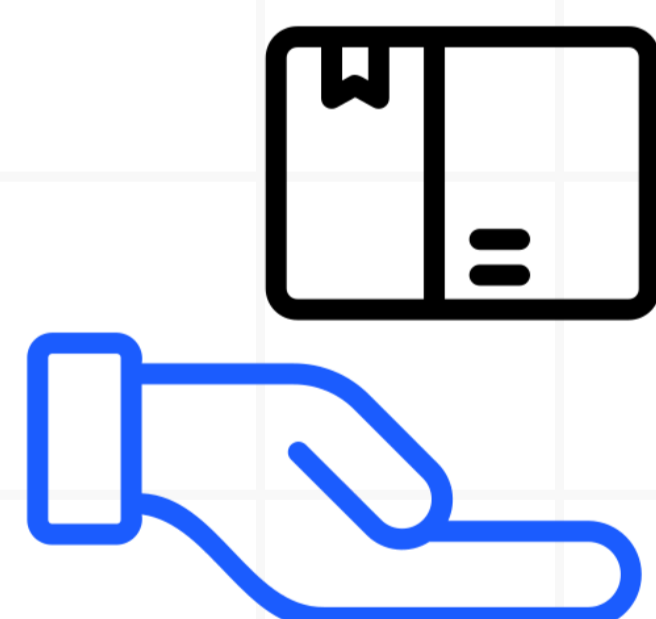

Role-Based Security & Access Control

Secure access by user roles and menus, integrated with Azure Active Directory for controlled and auditable access.

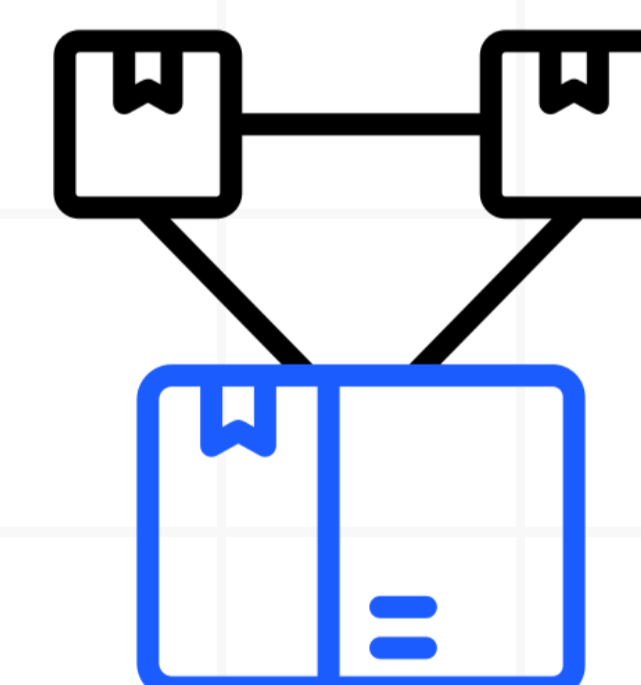

Template-Driven Configuration

Use templates to set up business data and transactions —no coding needed.

Designed for Performance & Reliability

Smart caching keeps screens fast and the system responsive, even with heavy use.

Open Integration

API-first design for easy integration with other systems.
